Graphs for each Country

In the main body of our report Human Rights During the Pandemic, we present graphs showing our findings across all human rights experts from 39 countries.

In this Appendix, we present graphs showing the full responses from human rights experts, country by country.

For each country, shown in alphabetical order, some or all of the following are available:

- A graph showing how badly each rights category was affected, based on the responses of human rights in our annual survey.
- A graph for each of those rights categories: Safety from the State, Empowerment, and Quality of Life, showing which rights within the category were affected by Covid-19.
- For convenience, screenshots from the Rights Tracker, showing the change over time for Safety from the State and Empowerment rights.

In some countries with small populations, the first two sets of graphs were not able to be produced, because we could not get enough responses from human rights experts. In these cases we only show what is available.

Please note that the Rights Tracker has further information, including lists of which people groups were at extra risk of rights violations, and more context from our experts.
